

# KASPOOL

## 1. Project Overview

- **Objective:** Develop a sustainable, energy-efficient digital asset mining ecosystem that generates stable profits through advanced mining technology and profit-sharing with the community.
- **Solution:** Mining in countries with low-cost energy and favorable environments, combining POW and POS, applying AI in mining, and integrating high-performance mining units as NFTs.
- **Vision:** Build a strong and sustainable mining community through a diverse ecosystem, while enhancing the value of Kaspa coin, Kaspanet tokens, and the global cryptocurrency system.

## 2. Key Products and Services

- **Kaspool (KPL) Coin:** Kaspa's Layer 2 coin with a fixed total supply of 28.7 billion coins, supporting mining and transactions within the ecosystem.
  - 30% of the supply is allocated to ecosystem and community development.
  - 70% is gradually mined using a proprietary algorithm that combines POW, POS, and the best current blockchain features.
- **Kaspool Mining Phone:**
  - Supports token mining.
  - Provides data for Depin AI (Decentralized Physical Infrastructure Networks with AI).
  - Enables international payments without cards.
- **DEX and CEX on KRC20 and Private Blockchain:**
  - Decentralized and centralized trading ecosystems with KPL as the transaction fee currency.
  - Integrates multidimensional information processing via KRC20.
- **E-commerce Application:**
  - Supports global businesses in reaching customers without intermediary costs.
  - Offers incentives for KPL payments.
  - Secures customer behavior data.
  - Limits spam advertisements for users.
- **High-Performance NFT:**
  - Enhances mining efficiency by logically pooling capital and devices, with units uniquely identified and authenticated as NFTs on the blockchain.
  - Allows users to own entire "mining farms" through NFTs.

- **Kpool Capital:**
  - Invests in high-potential blockchain projects.
  - Invests in high-potential coins/tokens.
  - Invests in new technologies in the blockchain industry.

### **3. Project Development Roadmap**

- **Phase 1: Launch (Q4 - 2024)**
  - Market Research: Analyze technical requirements, identify energy partners, and prepare infrastructure in strategic countries.
  - Platform Development: Establish initial mining pools in Russia, Kazakhstan, and other regions.
- **Phase 2: Project Announcement and KPL Distribution (Q1 - 2025)**
  - Roadmap and Whitepaper Release: Detailed strategy, products, and services.
  - Company Website Launch: Market development strategies and community collaboration benefits.
  - KPL Token Airdrop: Launch an airdrop to build an initial community and generate interest.
  - Seed, Private, and ICO Sales Program: Execute token sales with a 3-year unlocking cycle, releasing tokens every two days and a 30-day post-listing lock.
- **Phase 3: Product Launch and Ecosystem Expansion**
  - Launch KASPOOL WALLET (Q1 – 2025).
  - Launch Kpool Capital (Q1 – 2025).
  - Listing on Exchanges (Q2 – 2025).
  - Game and Trading Ecosystem (Q2 – 2025).
  - Launch Kaspool Mining Phone (Q2-2025).
  - DEX and CEX on KRC20 (Q3-2025).
  - E-commerce Integration (Q4-2025).
- **Phase 4: Community Expansion and Mining Optimization (2026)**
  - Boost mining efficiency: Introduce high-performance NFTs and implement technological mining improvements.
  - Expand Mining Pools: Invest in additional pools in energy-advantaged countries.
- **Phase 5: Ecosystem Completion and Major Exchange Listings (2027)**
  - Expand KPL Ecosystem: Develop additional features and products to serve users and partners.
  - List on more large, reputable exchanges to increase KPL's reach and liquidity.

#### 4. Development and Marketing Strategy

- **Initial Marketing Campaign:** Build brand awareness through airdrops, community events, and affiliate marketing.
- **Strategic Partnerships:**
  - Partner with countries that have energy advantages.
  - Optimize mining technology to maximize profits.
- **Long-term Development Strategy:**
  - Ensure stable product and service delivery.
  - Increase community benefits.
  - Attract long-term investors and users.

#### 5. Financial Strategy

- **Funding Sources:**
  - Internal company funds.
  - Proceeds from token sales (Pre-sale, Seeding Sale, Private Sale, ICO, etc.).
  - Profit-sharing with the community.
- **Profits:** Profit-sharing with community users and expanding the diverse ecosystem to boost revenue.
- **Reinvestment:** Expand mining infrastructure, develop new products, and enhance competitiveness in the crypto mining market.
- 

#### ***KPL COIN with Total Supply 28,700,000,000*** **TOKENOMICS**

TOKENOMICS			
<b>Pre-Mined</b>	<b>8,610,000,000</b>	<b>30%</b>	Partially pre-mined, allocated for investors, community development, and ecosystem application development
DevTeam and Advisor	2,009,000,000	7%	Not unlocked for a period of 3 years
Airdrop	287,000,000	1%	Marketing and Ecosystem  23%
PreSale	861,000,000	3%	
Seeding	1,435,000,000	5%	
Private Sale	2,009,000,000	7%	
ICO	2,009,000,000	7%	
<b>Community</b>	<b>20,090,000,000</b>	<b>70%</b>	Gradually mined by the community through specialized machines or mining-enabled phones, with the output halving each year

### Expected allocation of funds for the Ecosystem

Category	Percentage (%)	Amount (coins)	Notes
<b>Multi-chain Wallet Development</b>	12%	3.444 billion	For research, development, and maintenance of a multi-chain wallet supporting various blockchains.
<b>Exchanges (CEX + DEX)</b>	13%	3.731 billion	Development and operation of centralized and decentralized exchanges (CEX and DEX), supporting liquidity, P2P transactions, reducing fees, and enhancing security.
<b>Mining Equipment Production</b>	12%	3.444 billion	Production of mining-enabled phones and devices to expand the Kaspool ecosystem.
<b>Blockchain Game Development</b>	8%	2.256 billion	Research and development of interactive games based on blockchain technology.
<b>Technology Upgrades &amp; Research</b>	12%	3.444 billion	Investment in improving performance and developing new technologies, enhancing protocols.
<b>Kpool Capital Investment Fund</b>	8%	2.256 billion	Creating an investment fund to support potential blockchain projects and develop the Kaspool ecosystem.
